

*Focused on High Quality Tier 1
Gold and Zinc Assets*

Solitario Resources Corp.

April 2, 2025 – Mining Forum Europe

Forward Looking Statements

This presentation includes certain "Forward-Looking Statements" within the meaning of section 21E of the United States Securities Exchange Act of 1934, as amended. All statements, other than statements of historical fact, included herein, including without limitation, statements regarding potential mineralization and reserves, exploration results and future plans and objectives of Solitario, are forward-looking statements that involve various risks and uncertainties. There can be no assurance that such statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements. Solitario's Golden Crest land position does not cover any of the areas of historical gold production or historical unmined resources but are thought to be on trend with these known areas of mineralization. Certain historical information concerning exploration and gold production in the Black Hills region has been obtained through both public and private sources and are believed to be substantially factual, but Solitario can give no assurances of the accuracy of such information. Development of Solitario's properties are subject to the success of exploration, completion and implementation of an economically viable mining plan, obtaining the necessary permits and approvals from various regulatory authorities, compliance with operating parameters established by such authorities and political risks such as higher tax and royalty rates, foreign ownership controls and our ability to finance in countries that may become politically unstable. Important factors that could cause actual results to differ materially from Solitario's expectations are disclosed under the heading "Risks and Uncertainties" as well as the COVID-19 related risks as disclosed on Form 10-K for the year ended December 31, 2022, filed with the SEC and elsewhere in Solitario's documents filed from time to time with Canadian Securities Commissions, the United States Securities and Exchange Commission and other regulatory authorities.

This presentation contains estimates of mineralized material based upon measured, indicated and inferred mineral resource categories that are recognized and required by Canadian regulations, but the SEC does not recognize them and U.S. reporting companies are normally prohibited from including resource estimates in their U.S. filing. U.S. investors are cautioned not to assume that any part, or all, of mineralized material or mineral resources categories will ever be converted into reserves. The economic significance of Proven and Probable Reserves differ substantially from mineralized material and measured and indicated mineral resources. Furthermore, economic viability has yet to be established by a feasibility report for mineralized material and the Company has not yet determined that any part of the mineralized material can be legally mined. This presentation also contains information about adjacent properties on which we have no right to explore or mine. We advise U.S. investors that the SEC's mining guidelines strictly prohibit information of this type in documents filed with the SEC. U.S. investors are cautioned that mineral deposits on adjacent properties are not indicative of mineral deposits on our properties.

This presentation (including drill hole information and mineral reserve and resource numbers) has been reviewed for accuracy by Mr. Walt Hunt, former COO for Solitario Resources Corp., or Sandor Ringhoffer, CPG, SME RM, a geologic consultant to Solitario, both of whom are qualified persons as defined by National Instrument 43-101.

Exceptional Maiden Drilling Results

- **36,500-acre property – never been drilled prior to Solitario**
- **Six of eleven holes intersected significant gold mineralization**
- **Mineralization in three Upper Limestone units: high-grade surrounded by low-grade**
- **Mineralization in Lower Deadwood: high-grade surrounded by low-grade**
- **High-grade mineralization (+11 gpt gold) in paleo-placer on top of Precambrian**
- **Mineralization open in all directions**

Three Drill Holes Completed to Date at Downpour

GC-008 – New Wharf-Style Gold Discovery

- Wharf mining complex produced over three million ounces of 15-50 gpt high-grade gold
- Last Two Meters of Drill Hole GC-008 intersected 3.4 GPT Gold in Lower Deadwood Formation
- First ever gold discovered in Lower Deadwood outside of the historic district

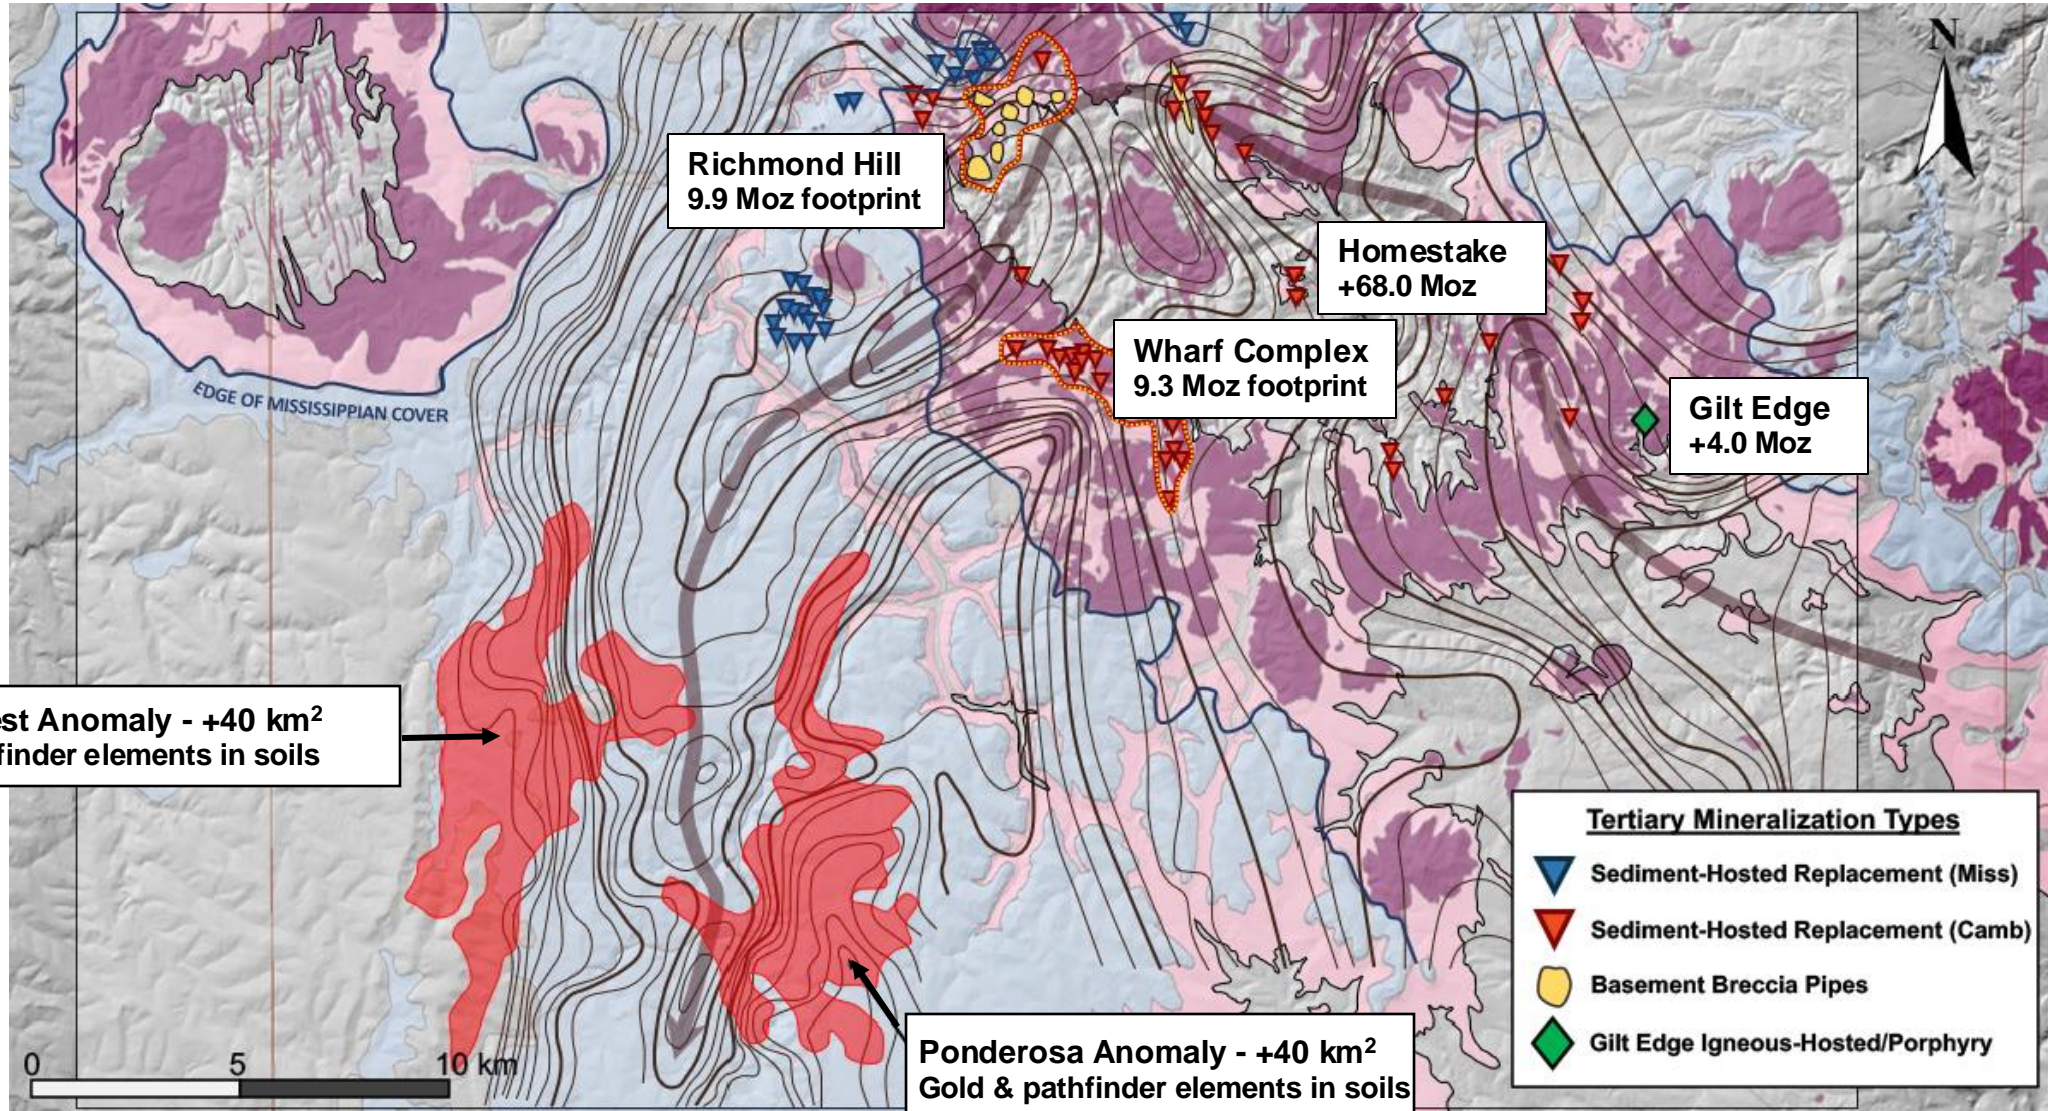

DDH Hole	Interval (meters)	Thickness* ² (meters)	Gold Grade (grams/tonne)
GC-008* ¹	322.5 to 363.5	41.0	1.0
Including	344.2 to 363.5	19.4	1.7
Including	344.2 to 349.9	5.7	2.2
Including	355.1 to 363.5	8.4	2.1
Including* ³	361.5 to 363.5	2.0	3.4

*¹ 280° azimuth -65° inclination

*² True thickness cannot be estimated based on this single drill hole.

*³ Last two intervals in hole – hole ended at 363.5 meters.

Ponderosa Gold Anomaly

World Class Partners

Partnering with well funded, leading zinc producers reduces costs, risk and capital requirements

Florida Canyon Zinc Project held jointly with Nexa Resources S.A., 5th largest zinc producer with three underground zinc mines and large zinc smelter in Peru.

Lik Zinc Project in partnership with Teck Resources, 3rd largest zinc producer with worlds largest zinc mine (Red Dog) situated just 11 miles from Solitario's Lik deposit.

Florida Canyon Zinc Project, Peru

Joint ventured with Nexa Resources S.A.
- Funded to Production

Advanced exploration project with nearly \$90 million in partner investments (526 drill holes; 134,416 meters)

Preliminary Economic Assessment demonstrates robust economics

Significant resource increase announced February 16th, 2021

Outstanding metallurgy confirmed 2023

Two core holes completed in late-2023

Funded to Production

All future costs - drilling, PEA updates, pre-feasibility costs, community relations, environmental expenses, metallurgical studies, engineering & feasibility - will be funded by Nexa to earn its 70%-interest in the project.

- ✓ Solitario will not pay back any of these costs.

After feasibility, Nexa will fund Solitario's 30% participating interest through a loan to Solitario.

- ✓ Interest rate will be at Nexa's cost of funds – currently about 5%.

Solitario will fund loan repayment to Nexa through 50% of the net cash flow from its 30% participating interest.

- ✓ Allows for significant cash flow to be achieved early.

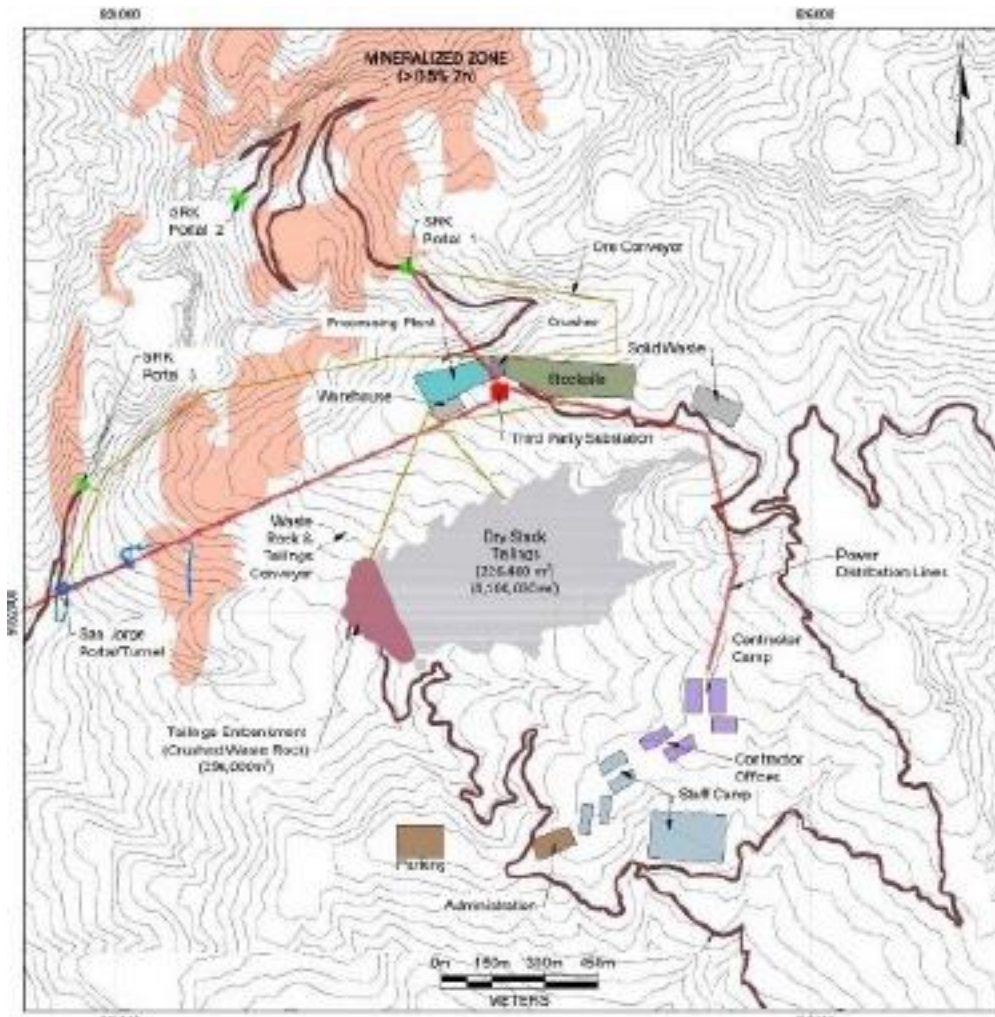

Solitario achieves production without capital risk or equity dilution!

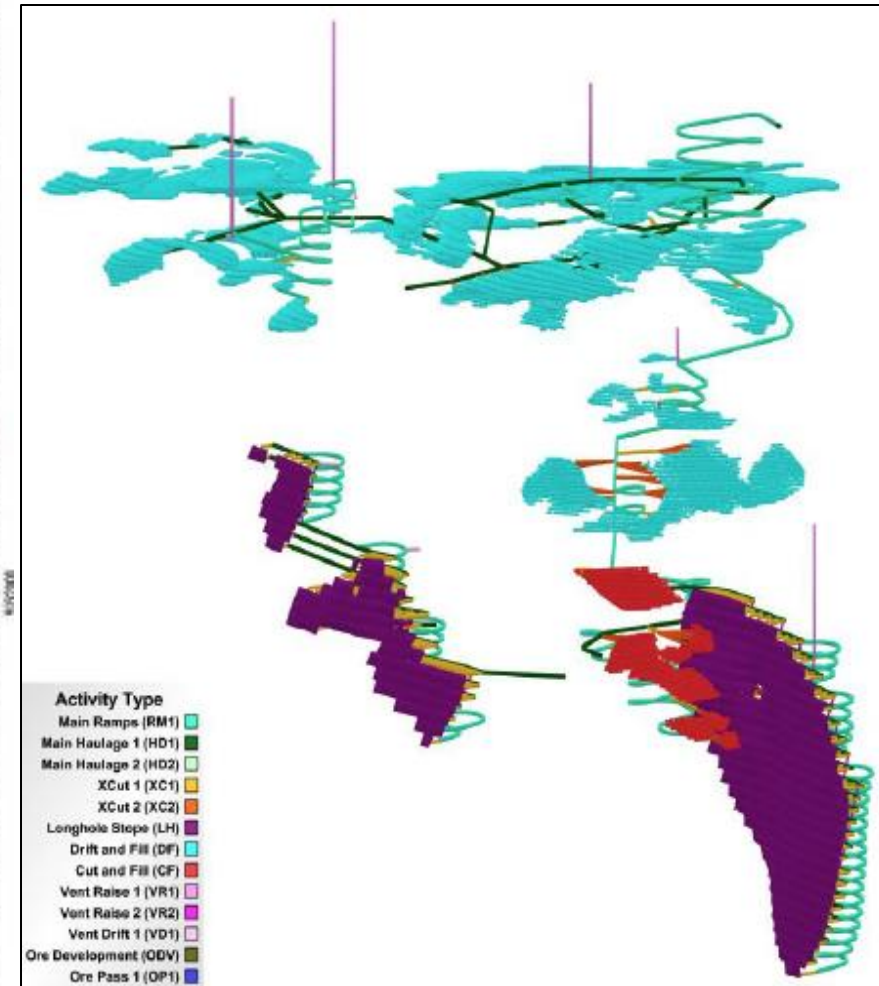

Florida Canyon Zn Project

Preliminary Infrastructure Layout

Mine Plan – Oblique View

Florida Canyon's Resource Grade is Significantly Higher than Nexa's Operating Zinc Mines in Peru

Florida Canyon's Mineable PEA Resource Grade: 10% Zn Eq

Nexa's Peruvian Operations Grade⁽¹⁾: 5.0% Zn Eq

⁽¹⁾ Average blended reserve/resource grade for Milpo's three underground Peruvian zinc mines.

Nexa Resources Acquires Karmin

- Nexa Resources acquired its joint venture partner's (Karmin Exploration) 30% interest in the Aripuana zinc project in Peru in 2019.
- Nexa paid Karmin USD\$70 million in cash, representing a nearly a 30% premium to the previous days market cap.

Lik Zinc Project, Alaska

50/50 Joint venture with **Teck**

- Mining claims covering 6,075 acres located 11 miles from Teck's Red Dog Mine, in mining friendly jurisdiction
- Large tonnage, high-grade, potentially open-pittable resource, with significant underground expansion potential
- Clean metallurgy
- Drilling conducted 2022 and 2023

2025 Catalysts

- *Drilling* four new high-quality drill targets at Ponderosa - Golden Crest*
- *Offset drilling of GC-008 –Lower Deadwood mineralization; and GC-010 –high-grade in Homestake paleo-placer + 11 gpt gold*
- *Reinterpretation of resource model at Florida Canyon*
- *New target identification at Lik*

** Pending permitting*
